*Contents*

**Proprietary Notices** . . . . . **iii**

**Contents** . . . . . **v**

**Chapter 1: Introduction** . . . . . **1**

**Chapter 2: New Features** . . . . . **3**

    SirPro . . . . . 3

    SirMon . . . . . 3

    Janus SSL . . . . . 3

---

**CHAPTER 1** ***Introduction***

This document lists the enhancements and other changes contained in the newest release of *UL/SPF*: version 6.9. The previous version of *UL/SPF*, 6.8, was released in March 2006.

---

**CHAPTER 2** ***New Features***

## **2.1 SirPro**

Updates from the previous release include:

- Dynamic widening of many more screens.

## **2.2 SirMon**

Updates from the previous release include:

- New statistics in anticipation of new releases of *Model 204*.
- New statistics added to the System Overview Screen, designed to enhance the monitoring of non-terminal threads, like Janus and MQ.
- Addition of a Janus Port monitoring section.
- Major upgrade of the background monitor, which provides for e-mail warnings when system thresholds are exceeded. E-mail warnings are available only to sites with *Janus Sockets*.

## **2.3 Janus SSL**

Updates from the previous release include:

- Support for intermediate certificates in the Janus SSL certificate management application.
- Many useability fixes to the Janus SSL certificate management application interface.
